

Bees and Seas is a local project born from a common passion to connect communities with nature, across the land and sea. Three community enterprises: **We Are FoodPioneers CIC, Friends of Brooklands Park and Creative Waves CIC,** have come together to create a community **beekeeping project** and educational training space in Brooklands Park.

The mission is to help engage the local community with conservation and pollinators through a series of collaborative activities, workshops and volunteering opportunities. Local volunteers have been working hard to transform this industrial site into a natural asset and the **Worthing Honey Collective** have been busy preparing our **Honey Bees** for onward delivery to their new home at the **Brooklands Apiary**.

None of this would have been possible without the vital funding, grants, sponsorships and donations received! We are very grateful to the **South Downs National Park Trust, Postcode Local Trust, the Sussex Transport team, Rampion Fund Sussex Community Foundation, Worthing Community Chest and Worthing and Sompting Lions** for their incredibly generous donations.

Come join us to celebrate **National Bee Day** on 21st August with a series of **FREE** family fun events, activities, shows, talks and stalls at Brooklands Park from **Friday 20th August** through to **Sunday 22nd August**.
